ORIGINAL DATA
With Original Data from vehicle manufacturers you can rely on the diagnosis.
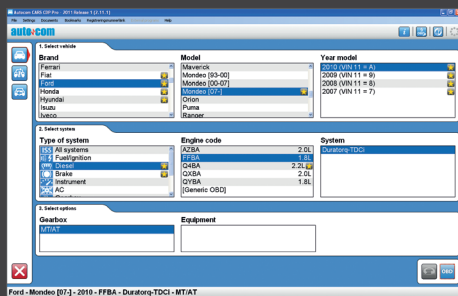

EXTENSIVE DATABASE
CARS database has a great coverage for the vehicle brands on the market.

Vehicle intelligence

AUTOCOM CARS & CDP+

In order to use CARS you need a vehicle communication interface (VCI). Our latest VCI is called CDP+. You buy CARS and CDP+ in a product kit which includes user license (1 year), cable bundle and a case. We offer a life time warranty as long as you have a valid license.

CARS

CARS software allows you to perform diagnostics on cars and light commercial vehicles. With ability to read and erase fault codes, make adjustments, activate vehicle functions and perform programmings. CARS comes with a 1 year user license with regular updates.

AUTOCOM CARS software

INTELLIGENT SYSTEM IDENTIFICATION
ISI

Automatically identifies the correct vehicle system for diagnostics.

INTELLIGENT SYSTEM SCAN
ISS
Scans through all the vehicle systems.

ORIGINAL DATA ®

Original Data from the vehicle manufacturers.

CDP+

The CARS software works together with the vehicle communications interface CDP+. This is a truly universal tool which covers all communication standards and protocols necessary to communicate with all types of vehicles. Together with our selection of adapter cables diagnostics on older vehicles and vehicles using proprietary connectors is as easy as it should be. CDP+ is your key to vehicle intelligence.
